

Until It's Gone  
Linkin Park

**Em**  
A fire needs a space to burn  
                                  **G**  
A breath to build a glow  
                                  **Em**  
I ve heard it said a thousand times  
                                  **G**  
But now I know  
                                  **C**                                  **Am**  
That you don t know what you ve got  
                                  **Em**                                  **G**  
Oh you don t know what you ve got  
                                  **C**                                  **Am**  
No you don t know what you ve got  
                                  **Em C G D**  
Until it s gone  
                                  **Em C G D**  
Until it s gone  
Until it s gone  
  
(**Em G**) 4x  
  
                                  **Em**  
I thought I kept you safe and sound  
                                  **G**  
I thought I made you strong  
                                  **Em**  
But something made me realize  
                                  **G**  
That I was wrong  
  
                                  **Em**                                  **C**  
Cause finding what you got sometimes  
                                  **G D**  
Is finding it alone  
                                  **Em**                                  **C**  
And I can finally see your light  
                                  **G D**  
When I let go  
  
                                  **C**                                  **Am**  
Cause you don t know what you ve got  
                                  **Em C G D**  
Until it s gone  
                                  **Em C G D**  
Until it s gone  
Until it s gone

**Em G C Am**

**Em G**

**C Am**

Until it s gone

**Em G**

Until it s gone

**C Am**

Until it s gone

**Em C G D**

Until it s gone

**Em C G D**

Until it s gone

**C Am**

Cause you don t know what you ve got

**Em D**

Oh you don t know what you ve got

**C Am**

No you don t know what you ve got

**G Em**

It s your battle to be fought

**C Am**

No you don t know what you ve got

**Em**

Til it s gone
