Am

G

```
Nobody Like You
Little Mix
[Intro]
    C
        G
    C
        G
[Verse 1: Jesy]
                                                 G
I m alive, and living s just a beating heart
                                                        G
Cause we won t admit we ve taken it too far
            Em
                                                           G
I know it s love cause I will always be the first
           Em
To start making up excuses when it hurts
[Pre-Chorus: Jesy]
But I m alone, I m alone, I m alone again
And all I want, all I want is to feel again
[Chorus: Jesy]
There s nobody like you, nobody like you
I ve tried goodbye a hundred times, not one of them true
Nobody like you, nobody like you
                                                              D
I m screaming, I don t want you but you know that I do
[Verse 2: Leigh-Anne]
                                            G
Strong, a side of me you never found
                                                            G
 Cause you only see me when my guard is down
             Εm
                                                    G
And it s wrong, and I hate that it s the truth
But I only like myself when I m with you
[Pre-Chorus: Jade]
```

D

```
But I m alone, I m alone, I m alone again
And all I want, all I want is to feel again
[Chorus: Leigh-Anne & Jade]
                                      Em
There s nobody like you, nobody like you
I ve tried goodbye a hundred times, not one of them true
Nobody like you, nobody like you
                                                              D
I m screaming, I don t want you but you know that I do
[Bridge: Leigh-Anne & Perrie]
   Am
                                     D
Oh, I wanna feel you in the dark
                                      Em
I could use, I could use some
                                          C
But all you left me with was scars
And that s the hardest part
There s nobody like you, nobody like you
I ve tried goodbye a hundred times, not one of them true
[Chorus: Perrie]
There s nobody like you, nobody like you
I ve tried goodbye a hundred times, not one of them true
Nobody like you, nobody like you
                                                             D
I m screaming, I don t want you but you know that I do
[Outro: All]
                     \mathbf{Em}
Nobody like, nobody like, nobody like you
Nobody like, nobody like, nobody like you
Nobody like, yeah, nobody like you
        C Em
Nobody like, nobody like you
```
