

Love Club

Lorde

[Verse 1]

E

I m in a clique but I want out

B

It s not the same as when I was punched

In the old days there was enough

E

The card games and ease with the bitter salt of blood

I was in but I want out

B

My mother s love is choking me

I m sick of words that hang above my head

E

What about the kid? It s time the kid got free

[Chorus]

B

Be a part of the love club

E

Everything will glow for you

B

Go get punched for the love club

E

For the love club.

[Verse 2]

E

I joined the club and it s all on

B

There are fights for being my best friend

And the girls get their claws out

E

There s something about hanging out the wicked kids

Take the pill make it too real

B

The other day I forgot my old address

I m sitting pretty on the throne, there s nothing more I want

E

Except to be alone.

[Chorus]

B

Be a part of the love club

E

Everything will glow for you

B

Go get punched for the love club

E

For the love club.

[Instrumental]

E " **B** " **E** - **B**

[Verse 3]

B

Your clothes are soaked and you don't know where to go

So drop your chin and take yourself back home

E

And roll out your maps and papers

B

Find out your hiding places again

The only problem that I got with the club

E

Is how you're severed from the people who watched you grow up

When you're a member go on your great adventure again

And we'll be waiting at the end

[Chorus]

B

Be a part of the love club

E

Everything will glow for you

B

Go get punched for the love club

E

For the love club.

[Outro]
