Where We Belong
Lostprophets

So basically this songs just follows a **C#-G#-A#-F#** progression, with a few deviations. The only real challenge is matching the chords and melody, which I tried to do but I might be off by a little. Just listen to the song and figure it out. Also I'm not 100% about the breakdown, more like 90% but it's still good. This is pretty much based off the first version of the tabs and I just transcribed I think chords are easier to read. I use all sharps because if you capo the 1st fret ignore the sharps you can play it on acoustic (which is why I made this in the first For the most part it's a pretty easy song, good for beginners. Enjoy!

(In the actual song no one's playing here)
