Where We Belong Lostprophets

Where We Belong Lostprophets

So basically this songs just follows a C#-G#-A#-F#

progression, with a few deviations. The only real challenge is matching the chords and

melody, which I tried to do but I might be of by a little. Just listen to the song and

figure it out. Also I m not 100% about the breakdown, more like 90% but it still good. This is pretty much based off the first version of the tabs and i just transcribed

i think chords are easier to read. I use all sharps because if you capo the 1st

ignore the sharps you can play it on acoustic (which is why I made this in the first

For the most part its a pretty easy song, good for beginners. Enjoy!

(In the actual song no one s playing here)
