D       A                G
I won t wait for words...anymore
D                    A                   G
   It s under to yourself, and now I m so, so gone
D                    A                   G
   It s under to yourself, and now I m so, so gone

     A
Well trains take me so far,
   Bm                                   D
But only in my brain and thatâ€™s fine with me
              D
How could you do, you do this to me?
     A                                      Bm
Well circle around, and get yourself a better look,
           D
A better memory
       D
And you fall down, you do
A
File down these streets,
         Bm
Lined with fools and luxury
          D                   D
We send our best but nobody looked, yeah
```

```
      A
Just love me, love me
        Bm
This is how I m forced to live
             D
I donâ€™t wanna live like that
                      D
I donâ€™t want to live no second words (?)

A                           Bm
    Well trains take me so far,
                 D
But only in my brain
               D
And you do, you do, I sing the words for you
A                               Bm
    Well circle around and get yourself a better look,
             D
A better memory
        D
And you fall down, waiting on you
A
   File down these streets,
Bm                        D
Lined with fools and luxury
                   D
And we sinned but nobody looked, nobody looked, yeah
A
   Love me, love me
        Bm
This is how I m forced to live
             D
I donâ€™t wanna live like that
                      D
I donâ€™t want to live, oh your second word, to me (?)

D
   Expect me to seem
          Dsus2
Free from your care
                Dsus4          A/D
From your problems

D       Dsus2         Dsus4          A/D

D
   He is the best now, she s under pressure
Dsus2                              Dsus4
   He is the best now, she s under pressure
A/D
   These nights will go so quietly

```

You can play this 5 times also during the part above.
I'm not too sure if it's accurate, though.
