

Place We Were Made

Maisie Peters

Notes: C is the base of the whole song, you re just changing the low note through the whole thing. C/F and C/G can be replaced with regular ole F and G, but the original uses C/F and C/G. During the chorus, emphasize the low note in the chord a lot, but note the original uses a piano for these, so the low C and D have to be up the octave on the guitar unless you want to use a different tuning.

Chords:

C/F: Play just like a C with your thumb on the low F.

All other chords normal
