~Verse~

**Em**                    **G**  
And I m so tired  
          **Em**  
Of these buried lies,  
**D**                            **Em**  
We spoke about a thousand times  
          **G**    **Em**  
When all your friends stuck by your side  
**D**                            **Em**  
Turning backs and minds,  
                                  **G**    **Em**  
Whilst all this time, you ve been stabbing mine  
**D**                            **Em**  
And cut and dry at all my pride  
          **G**    **Em**  
But there s a scar you ll never find  
**D**                            **Em**  
Right behind my eye.

~Pre-Chorus~

**G**  
You won t sleep tonight  
          **Em**                            **D**    **Em**  
The whistle from the wind will haunt your mind

While they re all outside  
          **Em**                            **D**  
Swimming to the shore

Find the lighthouse in the dark  
          **D**    **Em**                            **C**  
And shine a light on every single soul that weeps  
          **G**                            **D**  
That you have torn  
          **Em**                            **C**                            **G**  
Find the lighthouse in the dark  
          **D**    **Em**                            **C**  
Directing ships that carry all their broken hearts  
          **G**                            **D**                            **Em**  
That you have torn apart    **C, G, D**
