

Cartoons And Forever Plans

Maria Taylor

Capo 6

D G A

Did you know the first time you were in my sight

And did you know that look that I threw at you

And did you know my love will never die

And did you know I can't do this without laughing

And did you know no matter where it takes us now

And did you know our love will never die

The pretend season that we fill

With cartoons and forever plans

I've seen it in your eyes

I will be satisfied

And did you know electricity favors us  
And did you know I'm not reading into anything

And did you know our love will never die

I will run away, I will run away, I will run

I will run away, I will run away, I will run

Our love will never die

I will be satisfied

And did you know my glass is never empty  
And did you know I'm not as fragile as I thought  
And did you know my love will never die
