

Lonely Bones

Marina and The Diamonds

Hi, guys. This is another song by Marina, and since I have done this Tab I love it even more! I finally get every word she sings, and I am amazed .. She always manages to put such meaningful stories and messages in melodies and words that don't let you expect it at first. It's stunning. I think most of this stuff is right, if you have anything to add or change, feel

By the way. In my opinion the most songs sound a whole lot better when you play them with barre chords. Including this one. It sounds just so much fuller and more defined. Just an advice, I think it's really worth learning Barre chords. ;)

No capo.

Am **G** **E**
Coasting through the graveyards hanging with the lonely bones

Just because they've got your earthly name engraved in gold

Am **G** **E**
Don't try to tell me, that this alters the world

Am G E
Of your soul

You can't take the gold with you anyway

Am G E
