Lonely Bones

Marina and The Diamonds

Hi, guys. This is another song by Marina, and since I have done this Tab I love it

even more! I finally get every word she sings, and I am amazed .. She always manages to put such meaningful stories and messages in melodies and words that don t let you expect it at first. It s stunning.

I think most of this stuff is right, if you have anything to add or change, feel

free to contact me!

By the way. In my opinion the most songs sound a whole lot better when you play them with barre chords. Including this one. It sounds just so much fuller and more

defined. Just an advice, I think it s really worth learning Barre chords. ;)

No capo.
