

City Of Black And White
Mat Kearney

One of my favorite songs on the album. And not too tough at all. Standard tuning, no capo.

The chords aren't full, though, so here's what I've come up with:

Em = 000220 (normal)

C = 010230 (normal)

G = 030023 / 000023

D = 032002 / 002002 / 030450

As for the variations for G and D, you can just decide which one goes best for which part. But he is always playing the top E string open, so keep that in mind

(all the chords listed have the E open).

Em **C**
This whole city's black and white

G
Tell me what is your color

C **G** **D**
Could it be the same as mine?

Em **C**
Faded greens and blue street lights

G
There's a red fire burning

C **G** **D**
In the sea up to the sky.

C
I don't want to wait until tomorrow

Em
To tell you how I'd feel the rest of my life

C **G** **D**
You don't want a waste another minute to realize

C
Walking on the dark side of the evening

Em
Baby it is you, that opened my eyes

C
Burning like a fire on the water

C **G** **D**
The city of black and white.

C **G** **D**
Won't you just stay?

C **G** **D**
Won't you just stay?

The rest is all the same. For the breakdown, the same chords are used, just listen to find out the rhythms and which goes where.
