Album: more than you think you are
Tabbed by JBravo20

This is my first tab on a song, so don't complain if it's wrong.
Just send an e-mail to JBravo20@earthlink.net so I can correct this.

In my humble opinion, I find it better if you just start out with the
bass notes on the first verse and pre-chorus, then softly play the first chorus,
afterward play the second verse on with a louder tone, kinda like the CD.
