Hand Me Down
Matchbox Twenty
Tuning: Standard tuning with a capo on the 1st fret.
[Intro] (x2)
CF
[Verse 1]
Someday they ll find our small town world,
On a big town avenue,
Gonna make you like the way they talk,
When they re talking to you,
Gonna make you brake out of your shell,
Cuz they tell you to,
Gonna make you like the way they lie,
Better than the truth,
They ll tell you everything,
You wanted someone else to say,
They re gonna brake your heart.
[Chorus]
From What I ve seen,
                              Dm
            G
You re just one more hand me down,
But no one s tried to give you,
What you need,
      G
                       Am
Lay all your troubles down,
I am with you now.
[Verse 2]
Somebody oughta take you in,
Try to make you love again,
Try to make you like the way they feel,
When they re under you skin.
```

Never once to you think that they would lie,

```
When they re holding you,
You wonder why they havn t called,
When they said they d call you,
You start to wonder,
If you re ever gonna make it by,
You ll start to think,
You where born blind.
[Chorus]
From What I ve seen,
                              Dm
You re just one more hand me down,
But no one s tried to give you,
What you need,
                       Am
Lay all your troubles down,
I am with you now.
[Bridge]
I m here for the hard times,
The straight to your heart times,
When living ain t easy
You can stand up against me,
And maybe rely on me and
Cry on my, yeah
[Solo]
C F
[Verse 3]
Someday the 11 open up your world,
Shake it down to the very core,
Do their best to change you,
They still can t erase you.
[Chorus]
```
