Tuning: Standard

First chords tab, for this addicting but simple song :D

The confusing part about this song s chords is that the progression goes C-Am-Em-

F, in two different directions at different times. So for bass, I ll label it Bass1 and Bass2.

The arpeggio usually follows the second. The chords otherwise match with each other.

Bass1 chords: C-Am-Em-F (Each chord lower than one before)

Synth Arpeggio, Bass2 chords: **C-A-E-F** (Go down from **C-A**, then go up to **E** then **F**)

Synth Solo notes: **E-C-E-C-G-C-E-C/E-C-E-C-A-C-E-C**

Chorus Ohhs notes: **E D E G E D C A C D E C / E D E G E D C D C A C**

E D E G E D C A C D E C / E D E G E D G E D E D C
