

Spoonful Of Sugar
Matt Mays

tuning is DGCFAD
very simple song

Main riff

```
      Em              C              G
[-----]
[-----]
[---0-----0-----0-----0-----0-----0-----0-----0-----]
[-----2-----0-----2-----0-----0-----0-----0-----0-----]
[-----3---3---3---3-----]
[-0---0---0---0-----3---3---3---3---3---3---3---3---]
```

```
      Em              C              G
Spoon full of Sugar in Montreal city
      Em              C              G
When the leaves are dying and look so pretty
      Em              C              G
At home the ships are on the rocks and sinking
      Em              C              G
And as hard as we try we just cant stop thinking
      Em              C              G
Dirt in my fist roots on my sleeve
      Em              C              G
This year the trees fell before the leaves
      Em              C              G
People like me like people like you
      Em              C              G
Cause people like you are far too few
      Am              C              G
Oh night and daylight had got nothing on you
      Am              C              G
And nothing s everlasting when your always just passing through
D              C              G
ohhh
      Em              C              G
      Em              C              G
      Em              C              G
Ear full of music just when I need it
      Em              C              G
Your soul wont sing unless you bleed it
      Em              C              G
Lookin for answers through the night owl window
      Em              C              G
Million miles an hour through the wind and snow
      Em              C              G
```

Spoonful of Sugar in Montreal City

Em **C** **G**

Where the leaves are dying and look so pretty

Em **C** **G**

Nothing can cure the home sick disease

Em **C** **G**

This year the trees fell before the leaves.....(Repeat and fade out)
