On the F chord, you can barre all the strings or just strum the 1st four. Which ever way appeals to you. The chords listed for the intro are basically all you need for the song.

Its colors nod to sleep

**Am**

The coming dark

**E**

**F**

Can't hide what we can see

**G**

**Am**

**E**

**F**

**G**

Can't hide what we can see

The algebra

Of innocence

Is lost in the bathroom mirrors

Practiced born and steady

Been complacent

We've been bad neighbors

We've been unfaithful in our prime age

To open up to see what happens next

To see our hearts

To risk breaking our necks

To chop it down

To follow there against

So we'll be young again

Amazing world

The ground that gives

I know that you had some troubles

I have had some troubles

We been wasted

We've been complacent

We've given in to getting through the days

I saw a star

Fall from a green sky

I saw you laugh

Your eyes were opened wide

I saw your skin

Uncovered in the night

Uncovered in the night
