This is a song I happen to love and have seen many people do WRONG version of.  
And I  
wanted to share my knowledge of this great song!

FIRST TAB! Please feel free to send comments and whatnot !

During the main riff the chords are simply:

The moon lights up the room like day

Another night she spends alone

Without his touch of skin so cold

**Bm**

The blood is running through her veins

**G**

With every beat, there s no escape

Lost in everything she trusts

**G**

Still can t seem to get enough

Pre-Chorus:

**Bm**

Even though the world she loves

**G**

It won t ever be the way it was

Verse 2: (repeat chord progression for V1)

Memories, they take her back

Every moment fades to black

Every kiss and every taste

She wishes time would ease the pain

Pre-Chorus: (same as last)

Even though the world she loves

It won't ever be the way it was

And her heart is weak, her hands are shaking

Chorus: (same as last)

Every night she cries

And dies a little more each time

Say you love me

Nothing left inside

Say you love me

And the silence will set her free

Bridge:

**Bm, D,**

**A, G, Bm, D**

And every night she cries

**Bm A**

I don't know if I'll ever make this right

**Bm G**

Cause I am just so broken by the bitterness of loneliness

I'm so scared of this

**Bm A**

I don't know if I'll ever make this right

**Bm G**

Cause I am just so broken by the bitterness of loneliness

And I'm so scared

Pre-Chorus: (same as before)

Even though the world she loves

It won't ever be the way it was

And his heart of stone left hers breaking

Every night she cries

And dies a little more each time
