Verse

There are things that I ve come to believe since the new resurrection of love

There are visions I finally see, there are signs everywhere, they re below and above

There are things that I finally know, there are secrets and dreams never seen in the light

We are suddenly plunged into dark; our soul is a beast that goes bump in the night

There are endless nights, they just go on forever
There are scars on scars that I know will never heal
There s relentless pain, it tortures me forever
I ve got to pretend it s not real.

But at least it only hurts
At least it only hurts
Only When I Feel
It hurts Only When I Feel
