

Amazing

Meat Puppets

Intro (Chorus) : **G** (make sure you hit the G on the High E string for the
fingerstyle) | **C**
| **B** | **C** | **G** | **D** | **C**

Try to get out the fingerstyle by ear, (i find it kinda pointless to write it
out unless
it s a guitar pro tab) but if you can t it also sounds fine with just strumming
in some
kind of the same rythm.

Verse : You can try using C major instead of the add9 chord(and vice versa),
whatever
sounds better to your ear, but i think this is the more correct way to play it.

So that s basically it, not really difficult when you strum, but the fingerstyle
is
kinda hard to get for a beginner, i had a half decent way playing it but I don t
really know
what s going on with the bass strings all the time. for singing along it really
does
sound fine with strumming the chords. Oh and for the little bridge in the middle
it s just
an A Major Chord and then on the first time 2-3-5(or open D String) and 2-3-2-3
on the
second time on the A-String.

This is my first ever tab transcribed and only by ear, I didn t watch any videos
to
create it so if you have any suggestions to make it better contact me under :
