

## Synthetica

### Metric

Song: Synthetica

Artist: Metric

From the album Synthetica

Tabbed by: L.A Rai

**Dm**                    **F**                    **Am**  
Some of us are wild ones, ever underwanted,  
**F**  
I believe

**Dm**                    **F**  
Lining up in the background,  
**Am**                    **F**  
Waiting for the crap shot to be seen

**Dm**                    **F**  
In the shadow of the big screen,  
**Am**                    **F**                    **G**  
Everybody begs to be redeemed

**Am**                    **C**                    **F**                    **Dm**  
Hey, I m not Synthetica  
**Am**                    **C**                    **F**  
I ll keep the life that I ve got

**Dm**                    **F**                    **Am**  
We were never meant to crawl in for the bait,  
**F**  
We never will

**Dm**                    **F**  
I can think for myself,  
**Am**                    **F**                    **G**  
I ve got something no pill could ever kill

(same as before)

Hey, I m not Synthetica, oh  
I ll keep the life that I ve got, oh  
So hard, hard to resist Synthetica, oh  
No drug is stronger than me, Synthetica

**F**                    **E**                    **Am**  
We re all the time confined to fit the mold

**F**                    **E**                    **Am**                    **F**  
But I won t ever let them make a loser of my soul
