I Love You Too Death MGMT

The beginning of the song is kind of without tune but it gets better at 2:00. It s really simple, perfect for begginers to practice F chord or just rythm.

Who is much more than a friend,
But never by my side?
All beginnings are an end,
In the blackness there s a light
Maybe you will only read
One or two letters at the most
Shipping crates might line the streets,
Every stranger is a ghost
Cashiers won t deduct the pain,
Loneliness sleeps on the couch
Only noticing the stain
Once the color s faded out

C Am

To the back end of a hearse Take your hand against my own, AmIf there s a finger I can grip Reassure me at the ace Am Mine s a black heart you could flip I ve come to terms with what I have, Am What s been given, what s been asked Turn my back against the sea, Am And beg the serpent for a dance But in the red dirt muddy towns, Celebration of the dark Children walking hand in hand AmWith the pygmies in the park I can t touch you only once, Am You always leave me wanting more So keep my feet within the house, Am And stick my toes just past the door Let me know when I m in love, Let me die when I m in love
