

**In High Places**  
**Mike Oldfield**

**Em**                      **D**  
Look down from in high places  
**C**                      **D**  
Lift off the ground  
**C**                      **D**  
Without a sound, yeah

**Em**                      **D**  
We move through open spaces  
**C**                      **D**  
The wind, it pulls  
**C**                      **D**  
The sky gets close, yeah

**G**  
Could we get much higher?  
**D**  
Could we get much lighter?  
**Em**      **C**              **D**  
Navigator to heaven

**Em**                      **D**  
Check out, did you check your heart?  
**C**                      **D**  
This cloudless blue  
**C**                      **D**  
This starlight night, yeah

**Em**                      **D**  
Shoot out into the shining  
**C**                      **D**  
That devil moon (That devil moon)  
**C**                      **D**  
He sings of love, yeah

**G**  
Can we get much higher?  
**D**  
Can we get much lighter?  
**Em**      **C**              **D**  
Navigator to heaven

**Em**                      **D**  
The stars, so close we touch them  
**C**                      **D**

They seem so small  
**C**                    **D**  
They make me wonder

**Em**                    **D**  
Far out in formation

**C**                    **D**  
Five thousand moons

**C**                    **D**  
Floating balloons

**G**  
Couldn't get much higher

**D**  
Couldn't get much lighter

**Em**    **C**            **D**  
Navigator to heaven
