

Saved By A Bell  
Mike Oldfield

C G Am (F G)  
Would you like to look through my telescope?  
C G F  
The Milky Way s a fine sight to see.  
F G Am C F  
All around our universe, we try so hard to view  
G  
What s new.

C G Am (F G)  
Make a trip down to Sagittarius  
C G F  
And take a spin by some nebula.  
F G Am C F  
I hope the sky stays clear for us, tonight goes on so far  
G  
In stars.

[ Chorus ]

G C  
Saved by a bell,  
F G  
Suffer in hell,  
Dm F G  
But you were too blind to tell.  
G C  
Saved by a bell,  
F G  
Suffer in hell,  
Dm F G  
And you made it through so well.

C G Am (F G)  
Shining like bright diamonds, the galaxies.  
C G F  
Jupiter and Saturn spin by.  
F G Am C F  
Passing by companions, they all go drifting by.  
G  
They fly!

C G Am (F G)  
Carry me down to see Aquarius.  
C G F  
We re hoping to meet a shooting star.
