Blues By Five
Miles Davis

Just the chords, I think, maybe to simplified for ultra-jazz snobs, but somehow I
gotta make 300 characters here.

```
Bb7                              |Bb7                           |Bb7           |
Bb7
Eb7                              |Eb7
Bb7                              |Bb7                           |Bb7           |
Bb7|
G7(b9)  Cm7              |F7(b9)                   |
```

Play it over and over like this.

```
Bb7                              |Bb7                           |Bb7           |
Bb7|
Eb7                              |Eb7                           |
Bb7                              |Bb7                           |Bb7           |
Bb7|
G7(b9)  Cm7              |F7(b9)                   |
```
