Wrecking Ball
Miley Cyrus

This is my first submission. also you can play around with the **A** I understand it

sounds a little weird.
*strum once
Standard Tuning

[Intro]

C#m E B A

[Verse]

```
    C#m                          E
 We clawed, we chained our hearts in vain
    B                        A
 We jumped, never asking why
    C#m                  E
 We kissed, I fell under your spell
   B                     A
 A love no one could deny
```

[Pre-Chorus]

```
 A                      C#m
 Donâ€™t you ever say I just walked away
 E                      A
 I will always want you
 A                      C#m
 I canâ€™t live a lie, running for my life
 E                      Bb*
 I will always want you
```

[Chorus]

```
                     E
 I came in like a wrecking ball
 B            C#m
 I never hit so hard in love
 A                    E
 All I wanted was to break your walls
 B                        C#m    A
 All you ever did was wreck me
          C#m     A
 Yeah, you wreck me
```

[Verse]

```
    C#m                  E
I put you high up in the sky
      B                       A
And now, youâ€™re not coming down
C#m                       E
It slowly turned, you let me burn
      B                       A
And now, weâ€™re ashes on the ground
```

[Pre-Chorus]

```
  A                   C#m
Donâ€™t you ever say I just walked away
E                   A
I will always want you
A                     C#m
I canâ€™t live a lie, running for my life
F                     A*
I will always want you
```

[Chorus]

```
                   E
I came in like a wrecking ball
B               C#m
I never hit so hard in love
A                   E
All I wanted was to break your walls
B                       C#m    A
All you ever did was wreck me
                   E
I came in like a wrecking ball
B                       C#m
Yeah, I just closed my eyes and swung
A                       E
Left me crouching in a blaze and fall
B                       C#m    A
All you ever did was wreck me
         C#m    A
Yeah, you wreck me
```

[Bridge]

```
A                       C#m
I never meant to start a war
                           E
I just wanted you to let me in
                   G#m
```

```
And instead of using force
                               A
I guess I shouldâ€™ve let you in
                             C#m
I never meant to start a war
                               E
I just wanted you to let me in
                             G#m
I guess I shouldâ€™ve let you in

A                    C#m
Donâ€™t you ever say I just walked away
E                       A*
I will always want you

[Chorus]

                     E
I came in like a wrecking ball
B                 C#m
I never hit so hard in love
A                    E
All I wanted was to break your walls
B                        C#m    A
All you ever did was wreck me
                    E
I came in like a wrecking ball
B                       C#m
Yeah, I just closed my eyes and swung
A                       E
Left me crouching in a blaze and fall
B                       C#m    A
All you ever did was wreck me
          C#m    A
Yeah, you wreck me
          C#m    A
Yeah, you wreck me
```
