If the light takes you in will you know where you ve been all this time?
Em **Bm** **C** **Bm** **G** **Am**
At the edge of a cliff you could almost just slip down the side
Em **C** **G**
When there s so much to do, don t you wish you could make up your mind?
Em **Bm** **G** **Bm**
But it know it s elusive, it grows and it burns you inside

Em **Bm** **G**
Oooooooooo...

Em **C** **G**
With my eyes mostly closed like a person who knows how to drown
Em **Bm** **C** **Bm** **G** **Am**
I ll squint at the sun and my shoulders will pray for the ground
Em **C** **G**
Let s throw something over, imagine it s us falling down
Em **Bm** **G** **Bm**
And thinking of death we will watch without making a sound

Em **Bm** **G**
Oooooooooo...

C **G**
But it s just the way you are, you don t have to be afraid
The way you look at the stars and how you think that they were made
The motion will never stop turning the night into the day

You ve gone away enough, when will you decide to stay?

Em **C** **G**
My trouble with everything always is nothing s just right
Em **Bm** **C** **Bm** **G** **Am**
Just to figure out nothing could keep you awake half the night
Em **C** **G**
Not to know what you want is a terrible thing you should fight
Em **Bm** **G** **Bm**
You just sift for the face of the dark while you wait for the light

Em **Bm** **G**

Em **Bm** **G**
Oooooooooo...
