

**Animaniacs - Yakkos Universe**  
**Misc Cartoons**

**C**

Everybody lives on a street in a city

**G7**

Or a village or a town for what it s worth.

And they re all inside a country which is part of a continent

**C**

That sits upon a planet known as Earth.

And the Earth is a ball full of oceans and some mountains

**C7**

**F**

Which is out there spinning silently in space.

**Cdim7**

**Cmaj7**

**Em6**

And living on that Earth are the plants and the animals

**Dm**

**G7**

**C**

**G7**

**C**

And also the entire human race.

**C**

It s a great big universe

**C G**

And we re all really puny

**G**

We re just tiny little specks

**G C**

About the size of Mickey Rooney.

**F**

**Cdim7**

It s big and black and inky

**Cmaj7**

**Em6**

And we are small and dinky

**Dm**

**G7**

**C**

It s a big universe and we re not.

**G7**

**C**

And we re part of a vast interplanetary system

**G7**

Stretching seven hundred billion miles long.

With nine planets and a sun; we think the Earth s the only one

**C**

That has life on it, although we could be wrong.

Across the interstellar voids are a billion asteroids

**C7**

**F**

Including meteors and Halley s Comet too.

And there s over fifty moons floating out there like balloons  
In a panoramic trillion-mile view.

And still it s all a speck amid a hundred billion stars  
In a galaxy we call the Milky Way.  
It s sixty thousand trillion miles from one end to the other  
And still that s just a fraction of the way.

Cause there s a hundred billion galaxies that stretch across the sky  
Filled with constellations, planets, moons and stars.  
And still the universe extends to a place that never ends  
Which is maybe just inside a little jar!

It s a great big universe  
And we re all really puny

We re just tiny little specks  
About the size of Mickey Rooney.  
Though we don t know how it got here  
We re an important part here  
It s a big universe and it s ours!
