

Anorexic Olsen Twin - I Guess Thats What Brains Look Like  
Misc Unsigned Bands

Best love song ever.

B F# G#m E x2

                  B                                  F#  
We were losing our minds, In the dark of the cottage  
                  G#m                                  E  
Cause we burnt the last candle, Wed eaten all of the canned food  
                  B                                  F#  
Me and my friend Patrick, boarded Ourselves indoors  
                  G#m                                  E  
We went north up the east coast, When we fled the horde I said,  
                  B                                  F#  
Patrick theres a girl back down south in the city  
                  G#m                                  E  
and I think I love her, she is so pretty  
                  B                                  Eb7  
And he said Its just us in here and its them out there  
                  G#m                                  E  
And survivors a few you know, And shes probably dead  
                  B                                  F#  
I said, I know that out there Im nothing but food  
                  G#m                                  E  
But if I cant be with her then I might as well be dead too

B F# G#m E x2

                  B                                  F#  
He said Chris Burrows you re crazy, but do what you gotta  
                  G#m                                  E  
If you really love her Im not gonna stop you  
                  B                                  F#  
This chainsaw is heavy, but at least youll be ready  
                  G#m                                  E  
Get going lover boy theres a boat by the jetty  
                  B                                  F#  
I said thank you dear Patrick Ill never forget you  
                  G#m                                  E  
I promise if I can Ill come back and get you

B F# G#m E x2

                  B                                  F#  
So me and my dog rode the boat down the river  
                  G#m                                  E  
Hungry and tired when we finally got there  
                  B                                  F#

The place was a warzone those bastards were everywhere

**G#m E**

With death in their eyes, They ran and they ran

**B F#**

I said hey there small boy I dont wanna use this

**G#m E**

Come any closer I promise Ill do it

**B**

I guess thats what brains look like

**Eb7 G#m**

And thats how it feels when you kill children

**E**

But when you love a girl

**B F#**

You just can not stop Till youre holding her tight

**G#m E**

So I kept on fighting Praying that shes still alive

**B F# G#m E x2**

**B F#**

So we walked to her house, Up the hill to west Hobart

**G#m E**

Expecting the worst and Im with a crowbar

**B F#**

I kicked down her door, she said, quick to your left

**G#m E**

My new boyfriends one of them, Its like hes possessed

**B F#**

So I hacked him to pieces, And when I was done

**G#m E**

We made out for hours, And she said I knew you would come

**B F# G#m E x2**

**B F#**

Now we live on a farm, That we built down by the sea

**G#m E**

Somewhere they wont find us, Hidden by the trees

**B F#**

We play with the animals, Grow all our own food

**G#m E**

**B**  
And I think I love her, And I think that she loves me too
