CAPO 2

```
                     C#
If I go walking past the town signs
                 F#
Further on down the highway
                            C#
They’ll be something waiting for me
              G#7
I’m not fooling myself again

                   C#
You know I left this all behind
                   F#
Long before you came across my mind
                 C#
Nothing kept me from leaving that day
                   G#7
But that day was nothing like today
```

Chorus:
```
           Bbm
I fell on my knees then
                        F#
I prayed that change would spare me
            C#                    G#7
And that I could stay, That I could stay
            C#        F#        C#      G#7
The same, old way

                   C#
The times are flying right before me
                 F#
It’s not like before when I was blind
                 C#
I remember seeing only the colors
            G#7
Of the beautiful western skies
                 C#
Now things are much deeper
                 F#
Makes the darks much darker
                 C#
But the lights shine brighter
                 G#7
```

On your beautiful face

Chorus:
```
             Bbm
```
I fell on my knees then
```
                               F#
```
I prayed that change would spare me
```
                 C#                    G#7
```
And that I could stay, That I could stay
```
                   C#          F#        C#        G#7
```
The same, old way

```
                             C#
```
The colors turn and turn back again
```
                                F#
```
Thereâ€™s always something to believe in
```
                             C#
```
But thatâ€™s not what your searching for
```
                             G#7
```
No, itâ€™s something more hidden
```
                             C#
```
You could spend your life waiting round
```
                             F#
```
Or you could finally up and leave this town
```
                             C#
```
But that something just followed you
```
                           G#7
```
No matter which road you go down

Chorus:
```
             Bbm
```
I fell on my knees then
```
                               F#
```
I prayed that change would spare me
```
                 C#                    G#7
```
And that I could stay, That I could stay
```
                   C#          F#        C#        G#7
```
The same, old way

```
                         C#
```
If I go walking past the town signs
```
                       F#
```
Further on down the highway
```
                             C#
```
Theyâ€™ll be something waiting for me
```
                     G#7
```
Iâ€™m not fooling myself again

```
                       C#
```
You know I left this all behind
```
                             F#
```
Long before you came across my mind

```
                  C#
Nothing kept me from leaving that day
                          G#7
But that day was nothing like today

Chorus:
          Bbm
I fell on my knees then
                              F#
I prayed that change would spare me
                C#                      G#7
And that I could stay, That I could stay

            Bbm
I fell on my knees then
                            F#
I prayed that change would spare me
                C#                      G#7
And that I could stay, That I could stay
              C#          F#          C#        G#7        C#
The same, old way
```
