The television s crooked eyes

you'll quickly learn to creep and cry

Gashcat - The Morning Sun Misc Unsigned Bands [Verse 1] Oh brother how you re leaving me In colors bright and bleeding free But you said you found the radio cage And over time it fades away Some place out in the open air you'll find a friend, you'll find me there I know, I know [Verse 2] But I'm sick inside and I'm sick of fear and I'm sick of always being here So if you can't quite follow me then grab a photo by the frame And lie down in the busy street you move your tongue, I'll move my feet I know, I know [Chorus] And I'll go into the morning, into the morning sun into the morning, into the morning sun into the morning, into the morning sun [Verse 3] And now the clouds are spinning sweet like records rolling on the screen

For all the way you'd head out west and carve her name into your chest
