Genta - Planet Me
Misc Unsigned Bands

One of the first songs I ve ever worked out, but I noticed it wasn t up here
anywhere. The song isn t meant for a guitar, but I found these chords went
pretty
nicely along with it. Sidenote: The F s in the chorus sound alright if you play
a
C instead, I just left the F because I liked how it sounded better, but it s up
to you.

Title: Planet Me
Artist: Genta (Featuring Kara DioGuardi)
Composer: Kara DioGuardi
Label: 2008 John Goci

CAPO 5

Planet Me

```
G                            D
Never think your gonna get a word in edgewise
Em                          C
Never think your gonna get a grip on my life
G                    D           C
That don t mean that I dont really want you
G                              D
I don t expect for you to know just what I m feeling
Em                                  C
On different days the things I say have different meanings
G                    D           C
That dont mean that I dont need you to hear me
G                        D          C
And sometimes it seems I just need you near me.

F
I dont know what you been waiting for
Am           E
Leave your baggage at the back door
F
Embrace everything that you adore
G                  D                Em
Welcome to planet, welcome to planet me
C
(Enter your self)
G                  D                Em
Welcome to planet, welcome to planet me
C
(Just dont leave)
```

(Set yourself free)

```
G                             D
If you wanna stay you better orbit round me
Em                                    C
I like it when you re close but dont ever crowd me
C                             Am
I got to feel like I m free I got to know you re with me
G                     D                         F
I got to look in your eyes and know for me you would die.
```

Chorus

```
G                     D
There might be life on other planets
Em                        C
If that s what you want then you can have it
G                     D
But I got love, and I want to share it
Em              C
I m inviting you to planet me.
```

Chorus x2
