Tuning: Standard

This is from Gimp, Tom Kalnoky s first band before Catch 22 and Streetlight.
Both
his other bands did a quicker version of Supernothing with horns, but the slow
theme is still there. I know there are other versions of this out there, but
none
with the real chords and full lyrics. So here ya go.

He centralizes around the violin (or trombone in Catch/Streetlight) part. Try
and
play this within the chords

```
          C    C/B     Am      G               F         G(or C)  G
e|---------------------------------------------------------------------|
B|---------------------------------------------------------------------|
G|---------------------------------------------------------------------|
D|---------------------------------------------------------------------|
A|-------3----2-3--2---0-----------0--------------------3-----2---------|
E|---------------------------3-------3-----1---------------------------|
```

That is the order of the chords. He does a few little things so this is how you
wanna play them.

```
          C    C/B     Am      G               F         G(or C)   G
e|-------0-0--0-0--0---0-0-0----3--3--3--3---1-3-3-1-1------3-----3----------|
B|-------1-1--1-1--1---1-1-1----3--3--3--3---1-----1-1------3-----3----------|
G|-------0-0--0-0--0---2-2-2----0--0--0--0---2-----2-2------0-----0----------|
D|-------2-2--2-2--2---2-2-2----0--0--0--0---3-----3-3------0-----0----------|
A|-------3-3--2-2--2---0-0-0----2--2--2--2---3-----3-3------2-----2----------|
E|-------0-0--0-0--0---0-0-0----3--3--3--3---1-----1-1------3-----3----------|
```

The G or C chord is really either because in the riff the bass note is C. It
does
end on a G. Tom plays G to G.

This pattern is good through the first two verses and first two choruses. After
the second chorus he plays something else, but still with the same chords. This
is
around 3:10 of the video posted below.

```
Palm Muted:
          C        C/B       Am        G           F              G(or C)  G
e|-------------------------------------------------------------------------------|
B|-------------------------------------------------------------------------------|
G|-------------------------------------------------------------------------------|
D|---------2---------2-------2-----------------------------------------------(0)--|
A|-----3-3----3-2-2---2-0-0---0----0-2---------3-----3---------2-----0-2---3-|
E|----------------------------3-----3--1-1----1-1---1-2-3-3---3-3---------|
```

Tom doesn t play the open D near the end, but he leaves space for it and it does

fit. After this over both of the verses it reverts back to the chord
progression.

Just for fun, heres what the violin actually plays:
```
          C    C/B      Am    G      F    G(or C)   G    *No Chord*
e|-----------------------------------------------------------------------------|
B|-----------------------------------------------------------------------------|
G|-----------------------------------------------------------------------------|
D|-----------------------------------------------------------------------------|
A|-------3----2-3--3--3-2------------------------0-2-3-2-0-2--------------|
E|-------------------------3--1------1-2-3-----3------------------------|
```

In the part he plays the single notes I like to end it with how the violin part
ends, but thats just me.
