

Ivri Lider - Jesse
Misc Unsigned Bands

Hey, so I know that there is pretty much NO guitar WHATSOEVER in this song, which is why I couldn't find it on this site when my friend requested that I cover it.

So like a good little music artist, I put together chords that I thought sounded really nice with the song.

It's pretty simple, just four chords. The only reason I'm using a capo, is because it fits my voice better, but you don't have to use one if you think your voice works without it.

CAPO on 1st Fret
