   I tried JQuery, Moo Tools and Prototype
A                        Em
   But IE still won t display my widget right
A                  Em
   And have you experienced the horror
A                      Em
   Of debugging in Internet Explorer
A                        Em
