Verse 1

Here we go again, you drive me round the bend
Saying everything's all right
Then when the sun goes down you change your tune
And the misery disturbs the night

I go out with my mates, my phone keeps flashing
Texts begging me to come back home
Saying that you miss me saying that you need me
And you hate being alone

So I arrive at the door slightly merry
With thoughts of lust in my head
Go upstairs get the cold shoulder
Mixed messages never end

Has she changed? Does she want me?
The questions pollute my mind
Is out love for real? Is she still breathing?
Is this punishment for a crime?

Chorus

Don't call me baby
It drives me crazy
One minute you want me
Then you go and drop me

Don't call me baby

It drives me crazy
One minute you want me
Then you go and drop me

Verse 2

I think long back when it was good
When your smile lit a flame in my heart
Then I think about now the hurt Iâ€™m feeling
When did all doubling start?

Is it you? Is it me?
Or am I over reacting?
But when I hold you close the feelings changed
Emotions lost in the dim

Of the room weâ€™re in just you and me
You clearly wanna be somewhere else
But you point the finger, say itâ€™s me
And I start to not like myself

So maybe the times come for last orders here
Shall we have one last for the road?
Hold each other close in grim denial
The turbulence is right on hold

Chorus

Donâ€™t call me baby
It drives me crazy
One minute you want me
Then you go and drop me

Donâ€™t call me baby
It drives me crazy
One minute you want me
Then you go and drop me
