

**George Silva - I Will Take You There**  
**Misc Your Songs**

This is an original I wrote some time ago. Here s a video with the way I intended it to sound, but feel free to make it your own: <https://www.youtube.com/watch?v=clqZnzAltba>

Capo on 3

**Cadd9**                    **G**                    **Em7**                    **Dsus4**  
I still don t know just quite how you brought be here then and now.  
**Cadd9**                    **G**                    **Em7**                    **Dsus4**  
You get me thinking about where we ve been where we re going and the in between.  
**Cadd9**    **G**                    **Em7**                    **Dsus4**  
Remember the days, the ones we shared  
**Cadd9**    **G**                    **Em7**                    **Dsus4**  
Remember the places, where we ve been  
**Cadd9**    **G**                    **Em7**                    **Dsus4**  
Remember the look, on that winter day  
**Cadd9**    **G**                    **Em7**                    **Dsus4**  
Remember that feeling, when you said...

**Em7**        **Cadd9**        **G**  
I will take you there  
**Em7**        **Cadd9**                    **G**                    **Dsus4**  
Let me show you where, I ll take you there.  
**Em7**        **Cadd9**        **G**  
I will take you there  
**Em7**        **Cadd9**                    **G**                    **Dsus4**  
Come with me now and I ll take you there.

We may not know yet where we re going we re in over our heads but we keep on trying.  
I know it s right and so do you all along nothing more to do.  
These stolen breaths, the air was holding  
A few missed beats, the heart was folding  
A few more words and we ve changed the game  
And now it s your turn to hear me say...

**Em7**        **Cadd9**        **G**  
I will take you there  
**Em7**        **Cadd9**                    **G**                    **Dsus4**  
Let me show you where, I ll take you there.  
**Em7**        **Cadd9**        **G**  
I will take you there  
**Em7**        **Cadd9**                    **G**                    **Dsus4**  
Come with me now and I ll take you there.

You know it, I know it, we ll take the world by storm.

Together we ll make it though.

Those eyes and that smile, your lips they cut right through me.

With you I ve got all I need

Let me take you there

Let me show you where, I ll take you there.
