## Over Over Moloko

Am No I won t interfere Em I m the only sound you ll ever need to hear Am Listen to my breathe so near Am Allow me to be every noise in your ear C Since that day I wake up early Every morning which is good Em But my stomach s churning, call me, It would be nice if you could Some days I question The suggestion Am You might not exist at all Can we meet and talk it over Would you be kind enough to cal Over and over Αm It s over all over Em And over and over and over And over....

No there s no middle ground Your off in another story Or merry-go-round

No there ll be no measured terms

You fly in the face of the way the world turns

Like a frozen tidal wave Since that day I m standing still You brought me here and I accept Though you regret I never will

Just one sweet word
And then a smile from you
Is almost worth everything
I ve given all I had to give
But you gave up giving in

You are everywhere I go
All the places we have been
I can t imagine where you are
For you are all I ve ever seen

Over and over....

All I ve ever known
All I ve ever seen
Places that I go
Places that we ve been
