I met Annie Ford out on the Great West road,  
D                G                A  
soaking through and thumbing for a ride.  
D                G D/F# Em  
She sat there on her suitcase in her dancing dress  
Bm                A                D  
I would ve been a fool to pass her by
```

```
                G                D  
And as we sped accross the night  
                Bm                G  
We told our stories by the light  
                D                A  
Of the stars that lead us home  
                G  
Each time we strayed  
                G                D  
Me and Annie talked till dawn,  
                Bm                G  
When we reached her old man s farm  
                D                A                G  
And I said so long; guess I ll be on my way
```

```
D                G D/F# Em  
I started meeting Annie by the old sawmill,  
D                G                A  
Wasting time and drinking in the day  
D                G D/F# Em  
Courting her was easy with her smile like that
```
