Burn Bright
My Chemical Romance

[Verse]

```
                        D#m
So give me all you ve got,
     F#              C#
I can take it
        A#                    B
We walked alone in your city lights
        F#            C#
Did you make it?
            D5                  D#m
We lit the fire and it s burning bright
        F#            C#
Did you take it?
                A#                B
Kissed all the boys in your city lights
            F#              C#
Did you make it?
            D5                  D#m
Left all the stars in your city nights
            F#              C#
Can you fake it?
            A#                  B
I lost my way in your city lights
            F#              C#
Clutching me,
            D5
We stole the fire
                    D#m
And it s burning bright
```

[Chorus]

```
                        B
So give me all you ve got,
     C#              A#
I can take it
        D#m              C#    B
We walked around in your city lights
            C#              A#
 Cause it makes me who I am
            D#m
We lit the fire
       C#                    B
And it s burning bright
     C#                  A#
Not ashamed of what I am
            D#m
I took the pills
```

```
          C#      B
For these empty nights
          C#              D#m
 Cause it makes me who I am
```

```
          C#      B
For these empty nights
          C#              D#m
 Cause it makes me who I am
```
