Cant Forget You
My Darkest Days

(And when its said and done
You re the only one
And when its said and done
You re the only one
You re the only one)

```
   F#              C#
Whoever said this pain
                  B
Would ever go away
                          C#
Didn t know what it meant to
                    F#
Be here without you
                    C#
Is everything you see
                  B
Reminding you of me?
                            C#
Does it hurt when you breathe too?

 Cause it does when I do

 Cause it does when I do

 B                      F#
When anybody says your name, I wanna run away
C#
I keep remembering and I can t forget you
 B                          F#
It doesn t matter what I tried, it happens anyway
 C#
Its been forever and I can t forget you
  B         F#
With every single day, it won t go away
            C#
(The way I feel about you)
 B              F#
And when it s said and done you re the only one
       C#                                    F#
And I can t regret you, so I can t forget you

(And when its said and done
          C#
You re the only one
 B
```

```
And when its said and done
            C#
You re the only one
              F#
You re the only one)

                      C#
I hate to feel this way
                        B
My days all feel the same
                    C#
And yesterday was proof
                      F#
That tomorrow will too
                    C#
No matter what they say
                      B
Can t drink it all away
                      C#
 Cause all that I do

Is think about you

Is think about you

 B                            F#
When anybody says your name, I wanna run away
C#
I keep remembering and I can t forget you
 B                              F#
It doesn t matter what I tried, it happens anyway
 C#
Its been forever and I can t forget you
  B          F#
With every single day, it won t go away
            C#
(The way I feel about you)
 B               F#
And when its said and done you re the only one
      C#                                B F# B C#
And I can t regret you, so I can t forget

(So I can t forget you)

 B                    F# C#
Stop haunting my dreams
  B             F# C#
Please set me free
  B                 F# C#
Stop haunting my dreams
   B           F# C#
Please set me free
```

(You re the only one)

```
 B                           F#
When anybody says your name, I wanna run away
C#
I keep remembering and I can t forget you
 B                               F#
It doesn t matter what I tried, it happens anyway
  C#
Its been forever and I can t forget you
  B          F#
With every single day, it won t go away
           C#
(The way I feel about you)
 B              F#
And when its said and done you re the only one
       C#
And I cant regret you

 B                       F#    C#
Stop haunting my dreams

(I cant forget you)
  B             F#  C#
Please set me free

(It s been forever and I can t forget you)
 B                   F#     C#
Stop haunting my dreams

(I can t forget you)
  B             F#   C#
Please set me free

(It s been forever and I can t forget you)
```
