[Verse]

I was never fond of love stories
But you already did know that, right?
                                      D
A heroine that is consumed by love
The endlessly continuing girl talk
The silly spreading of, gossip
                   G
I had always wanted to get out of it
    Em Bm
Now I m grown
                         Em
               C
I got what I wanted at last, but in return
Em Bm
I know
D
                  Em
                            G
                                   Am
I can t get the eternity, of memories or of your smile,
                       D
that you were going to give, baby
[Chorus]
C
                      Bm D
                                  G
             D
                                              Αm
I m sure that I love you, more than anyone else,
                              D G
                        Em
but - I ll walk on, this path, that I ve chosen
                        Em
Even if I m reborn, I ll keep on loving you,
                Em
but we can no longer be together
Cause life s no love story
[Verse]
I want to sleep in your arms,

G
                                Em
Just like a child
                                            \mathbf{Bm}
There are days when I ll suddenly wish for that, oh
Come to think of it, how long has it been
How long has it been, since I last cried?
But it s not like I can change now
Am
         G
             Em Bm
You know that I m grown
              C
                         Em G Bm C
I got what I wanted at last, but in return
Em Bm
I know
                                  G
                      \mathbf{Em}
                                        Am
that I let go of your smile, and all your affection and light,
                        D
that you were going to give, baby
[Chorus]
                      Bm D
No matter who I look at now, no matter who I spend time with
                                 G C
                    \mathbf{Em}
                             D
The day where I can, forget, you will never come
             D
I ll keep on loving you in my heart,
               Em
but we can no longer be together anymore
Cause life s no love story
[Bridge]
              D
                      Eb
                                         D
Even though I knew we would, go separate ways eventually,
                      G
                            Am
                                  Bm
                                       G
I m thankful for, the miracle that allowed us to meet
Those irreplaceable days,
       Bb
All my regret and pain,
              Bm G
and even my sadness
               D
can all shine, yes, someday...
