

What Dont You Understand
Ne-Yo

Ne-yo - What don t you understand tabbed by benedict lismont

CAPO 6th FRET !!!

Verse One

when i don t really know what the hell i m doing, i could be walking down
 the street, and if a guy notices me then you get upset. But if i m walkin
 with you, holdin hands or kissin, anybody can see what that means, should i
 wear a sign that says don t look at me.

baby im all yours, kissin and holdin , all in public,
 why do you think that s all for I don t give a damn
 bout nobody but you, but you always question, thinkin
 i m creepin, without a reason, why are you always stressin?
 lemme ask you a question.

Chorus - same as verse

Tell me what ,oh, don t you understand, doing all i
can, you do know that im your [woman?!?]
What, oh, don t you understand, if i wanted someone else,
then i would be with someone else but all i want is you.

Verse Two

and it s getting annoying (annoying) , and i can t prove
with what i think , that you been checking up on me, all
on my cellphone.but if you dont trust what you with me for
then, what i gotta do to make you see, tell me something
boy cause this is killing me.

baby im all yours, kissin and holdin , all in public, why
do you think that s all for ? I don t give a damn bout nobody
but you, but you always question, thinkin i m creepin, without
a reason, why are you always stressin?, lemme ask you a question .

Chorus

Tell me what ,oh, don t you understand, doing all i can, you do
know that im your [woman?!?]
What, oh, don t you understand, if i wanted someone else ,
then i would be with someone else but all i want is you.

verse three

and im at my wincin,(all im at my wincin) cause there s
nothing else that i can do(nothin else that i can do),
if you just dont get it, baby i should just be done with you ,
but i don t want to .

Chorus x2

Tell me what ,oh, don t you understand, doing all i can,
you do know that im your [woman?!?]
What, oh, don t you understand, if i wanted someone
else , then i would be with someone else but all i
want is you.
