```
C           Dm          Am                  F
Everything stops as we look towards the clock
 C          Dm                 C
It feels like weâ€™re moving backwards
C           Dm          Am          F
Itâ€™s easy to find potential in before
C           Dm              C
But we look the same in the after
C                           F
Could we wait long enough to bide my time
        Am                      F
Could we stay and say enough to change my mind
```

Chorus/Bridge (key change)
```
C (D)                              E (F#)
We could run away Maybe we could change
                 Am (Bm)                            F (G)
Get back on our feet and then Maybe make it home again
     C (D)                  E (F#)          F (G)
We could run away Be on our own again
C (D)                              E (F#)          Am (Bm)
Maybe in the twilight We can break out Buy ourselves a Cadillac
     F (G)               C (D)               E (F#)           F (G)
Never turn around We could run away Be on our own again
```

Verse
```
C           Dm          Am                  F
We could stay here where things became unclear
C           Dm                C
Fighting whatâ€™s left of the right way
C           Dm          Am                  F
But everyone hates the chances that we waste
C           Dm                C
Under the light of the new day
C                           F
Could we wait long enough to bide my time
Am                              F
Could we stay and say enough to change my mind
