

**Fading Yourself**  
**Negative**

(Verse 1)

**Am**                    **Em**                    **Am**  
Fade all the demons in your head  
**G**                    **Am**  
It s getting harder to understand  
**Em**                    **Am**                    **Em**  
Delusion all that makes no sense  
**Am**                    **Em**                    **Am**  
It s all in our minds, it s all in our eyes  
**G**                    **Am**  
They see what they want to see  
**Em**                    **Am**                    **Em**  
The whole truth beyond these endless lies  
**Am**                    **G**  
Every face that you make  
**Am**                    **G**  
They ve become so lame

(Chorus)

**Am**  
You re losing your faith  
**G**  
Can t you see  
**Am**                    **Em**  
that there must be something  
**Am**  
Something you know  
**G**                    **Am**                    **Em**  
And more to believe in  
**Am**  
You re fading yourself

(Verse 2)

**Am**                    **Em**                    **Am**  
Take some wasted years you thought you knew  
**G**                    **Am**  
And you ll see that you were wrong  
**Em**                    **Am**                    **Em**  
What it takes? What s the price of being in bloom?  
**Am**                    **G**  
You become so numb  
**Am**                    **G**  
All that mattered is gone

(Repeat chorus)

**G**                    **Am**                    **G**                    **Am**

If you keep looking back and feel sorry for yesterdays

**G** **Am** **G** **Am**  
You ll be one of the strangers you can t recognize yourself

**G** **Am** **G**  
The passion you felt it was so strong

**Em**  
Now it s gone.

(Repeat chorus x2)

**Em** **Am**  
You re fading yourself (x3)
