Solo: (C formation. The note that changes is the 3rd string [low E being the 1st string]

so only change your second finger. The frets for the 3rd string for the solo riff are:

>0--2--0--2--0--2--0--2--3--0--REPEAT Just listen to the song and play with the timing until you get it to sound like the song.

I m writing this as an acoustic player, so when you change your fingers, it still sounds

good when you strum out the whole C chord. Whatever you think sounds best!)
