

Blood Is Blood
Nerina Pallot

Actually, this is not the whole song. I still need to figure out the bridge, but I'll post what I know, so that if someone wants to help somehow they can do it :) here it is!

Intro: **C#m E F#m Bsus4 B (Bsus4 B)**

Verse: **C#m E F#m Bsus4 B**

Tinkerbelle, my winged friend I think we got it all wrong
No fairytales, no happy ending, just pre-historic songs

C#m E F#m B

A crystal in my baby's eyes
I want what I can't love
So now I've learnt how to despise
I think I've learnt enough

Chorus: **E C#m F#m B**

Blood is blood, and blood will flow, that's all it does, that's all it knows
But I've one question, I want something, I want more
And flesh is flesh, an urgent fire, it drags you down, this cheap desire
We all want something, maybe beauty maybe more..
