

**Ferris Wheel On Fire**  
**Neutral Milk Hotel**

Ferris Wheel On Fire - Neutral Milk Hotel

I put the chords over the rest of the lyrics because I like to have them there while I m playing.

Otherwise this is the same as the first version on here.

Both barre chords. Barre F on the first fret and G on the third. The F-G pattern continues through all verses.

**F**

Well now first of all

**G**

We became what we always had feared

**F**

Every engine holds

**G**

All their oils on fire appeared

**F**

They finally broke through

**G**

And on your shoulder

**F**

This weight has been placed upon you

**G**

And everything we ever learned

**F**

But now I m keeping still

**G**

In someone s bright carnival ride

**F**

All the crowd just cheers

**G**

As the bolts break and metal collides

**F**

Spiraling through

**G**

And flying up over the hills

**F**

And now everything s broken in two

**G**

And everything we ever would

**F**

But now most of all

**G**

I am holding you under my skin

**F**

Watch these buildings fall

**G**

Watch as each weak resistance caves in

**F**

**G**

All over you, all over

**F**

And now finally fading from view

**G**

Is everything we ever knew

Repeat F and G throughout the last part.
