

**Jesus Choir**  
**Neva Dinova**

This is a very simple and melodic song, its also pretty easy. The original recording is in standard tuning and its played using the G chord as a drone; Jake himself confirmed this a couple of weeks ago. Just listen to the song to get the tempo, its mellow though it sometimes speeds up. I also have the solo tabbed out but its easy to pick it out by listening, just make sure you got some decent distortion going on.... Rock on you rockers you...
