

Miracles
Newsboys

Follow Same riff throughout the song.

Intro/Outro: **F#5**

C#5

F#5

E5

You ever seen a brother or sister who could cure a disease

B5

I hadn t but I wanted to

Show the world that nothing s impossible if they can believe

They re gonna see a miracle

I didn t know what to do

So I went running to you

To find that cure

Now I know for sure...

I m done looking around

I finally figured it out

It s more than metaphysical

You got me up from down

Faith has shattered my doubts

I believe in miracles

I knew what I wanted to do but just like gravity s pull

I always did the opposite

Life was a meaningless party

I started to fall into a bottomless hole

But then I got a miracle

Some people don t have a clue

If all of this could be true

But take a look at me

I was blind but now I see

I m done looking around

I finally figured it out

It s more than metaphysical

You got me up from down

Faith has shattered my doubts

I believe in miracles

There s something that s missing

If we can t recognize

That our own existence

Is the miracle before our eyes

I m done looking around
I finally figured it out
It s more than metaphysical

You got me up from down
Faith has shattered my doubts
I believe in miracles

I m done looking around
I finally figured it out
It s more than metaphysical

You got me up from down
Faith has shattered my doubts

F#

I believe in miracles

It s more than metaphysical
